CLIENT

Cove Properties

SNAPSHOT

41 apartments

4 levels

Basement car parking

Car stackers

Completion 2013

Design & Construction Head Contract

ACHIEVEMENTS

This project was completed for a long term developer client that has worked with Buildcorp Commercial for over 15 years. The site team undertook the construction with meticulous attention to detail, particularly with the sandstone cladding to the facade. A key challenge was construction of the car stacker pits to the basement below the existing water table. This was overcome with the use of a sophisticated de-watering system.

This project reaped the benefits of a long-term, trusting relationship and was delivered under budget and ahead of program.

"We are delighted with Buildcorp Commercial's quality and ahead of time completion at our Boyd Park project."
